Peachtree or QuickBooks Retail Point Of Sale Software

“ . . . It is truly the easiest POS available today”

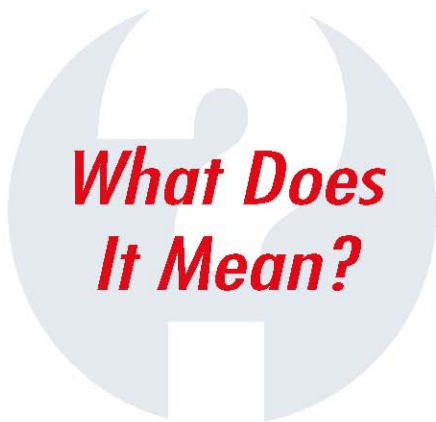

Retail allows your accounting software to do the accounting and inventory management. You will not have to disable or re-learn new accounting functions. Retail uses your already existing item list, and at the end of each shift, will update the sales and inventory directly to your financial software. (QuickBooks®, Peachtree®, or BusinessWorks®).

LESS training time for your sales team

LESS waiting time for your customers

On the Front End

On the Back End

Retail works just like a "Cash At the end of every shift, Retail Register" which enables users to collect efficiently processes and posts detailed sales information by using either a sales information exactly as if it was scanner or touch-screen, allowing you entered directly into your accounting to handle more customers quickly, software.
