

Why JCS AP?

Get big business benefits at an affordable price.

With JCS Retail Point of Sale and hardware solutions, you can expand the capabilities of your POS within a budget. We can provide POS software, hardware, installation and training as needed. You can leverage your existing investment in hardware and back office software for an integrated solution.

You benefit from automated data entry, streamlined sales processes, and improved financial accuracy.

Extend the capabilities of your existing financial software.

Nearly all business owners are using QuickBooks, Peachtree, or BusinessWorks for financial management. Why change? By adding JCS Retail as the front end POS system, there is no duplication of inventory, customer data or other accounting information. All your banking, cash and inventory management continues to be done in your accounting system. JCS Retail interfaces with your accounting software to adjust quantity on hand update sales accounts and post tendering totals automatically.

Communicate and collaborate more effectively.

JCS POS has been designed specifically to communicate seamlessly with your financial programs. JCS POS works with your accounting system not against it.

At the end of day Z report JCS POS automatically pushes the detailed sales and customer information into QuickBooks, Peachtree or BusinessWorks for more accurate financial records, better customer tracking and stronger reporting.

Implement solutions instead of technology.

JCS POS is designed to meet the POS needs of small to mid-sized business owners with little IT knowledge.

Our simple and streamlined set up will enable you to spend more time with your customers, and less time with computer parts and cables. Product manuals are provided on a CD at no additional charge. You can setup the POS system yourself, or we will do it for you.

It's easy to quickly implement price, product or menu changes. Changes done in the back are instantly updated at the POS machines.

Protect critical financial information more effectively.

Keep your financial information protected from curious employees. JCS POS does not require that your accounting programs be installed on the POS station, or even in the same location.

Use JCS POS Management to define who can change prices, process returns, voids, & end of day reports.

Access data and applications from any location.

All inventory, sales, and customer data is located in a central place, your accounting program. Pricing and product information can be easily uploaded where it is accessible to your sales team locally and in multi-locations.

Support that is there for you

All JCS POS development and support is done in the United States.

Improve Productivity

The JCS POS system is easy to use. Clerks learn the system in minutes.

Using a scanner and our interface to accounting and credit card services, your clerks can complete a 5 item transaction in 2.3 seconds.

Improve Control

Cash till accountability means no overages end up in someone's pocket.

Set inventory re-order points to be advised when inventory is running low.

Automatically process credit cards at the Point of Sale to avoid errors and reduce time.

Manage your Business

Management reporting tools allow you to mine your information to help you make better business decisions.

Reports generated straight from the financial software provide accurate sale tax and other critical reports.

Collect detailed customer information for marketing and mail campaigns.

With JCS POS you collect sales information automatically. No need to re-enter it into your accounting program.

JCS POS will also help you by eliminating the task of having to process purchase orders in one program, and then cut checks from another program.
